

Interpretation of how Central Office and AA Groups are affected by the Sedgwick County Stay at Home Order

Information from sedgwickcounty.org/covid-19/FAQs-for-stay-at-home-order/

Essential businesses include:

Health-care operations, essential infrastructure and essential government functions.

Do AA and similar groups count as healthcare?

Yes

What measures does the order expect Essential Businesses to take to prevent the spread of COVID-19?

Where possible, Essential Businesses should: (1) designate 6 feet of spacing between employees and customers; (2) make hand sanitizer, anti-microbial soap, and other sanitizing products available to employees and customers; (3) have separate operating hours for vulnerable populations; (4) post information online about how to best reach the business and how services can be provided remotely; and (5) provide protective equipment to staff members who have frequent contact with the public.

In the Sedgwick County Stay at Home order, Section 3, Essential Businesses are excepted from the definition of large public gatherings (more than 10 people). Does the governor's directive override this?

No, the Governor's order works in conjunction with the Sedgwick County Stay at Home order.
